Properties: White back Standard size rolls: 50"x150' on 3" cores.
Gray back Standard size rolls: 36"x100' on 3" cores.

Base Material	PP Synthetic Paper
Gloss level	15
White Point	94
Caliper	185 ± 10 μm
Opacity	96%
Shelf Life	Minimum 1 year when stored at 70F (21C) at 50% RH

Longevity: Mainly interior and protected exterior applications. Promotional-Medium term under normal conditions.

Handling: Avoid touching material on print face. Finger prints can appear in high ink areas if handled without clean gloves. Please keep material in its original packaging when not being used. Always keep away from dust, dirt and direct sunlight while stored.

Printing: 720 dpi, 8 pass will offer best results. Heater settings can vary between different equipment, avoid overheating; 85° -95°F is a good starting point. For the best color control, a custom profile for your RIP software should be created.

Finishing: This film does not require lamination. Pressure-sensitive laminates can be applied to increase the fade and abrasion resistance. Allow the ink to dry sufficiently before applying lamination. Product can be mounted to display board using double sided adhesive or adhesive board.
