DAF SDPC
Super Double Polish Clear Vinyl

Pictures used with permission from Anchor Industries. www.anchorinc.com

“Super Double Polish Clear” is not just a fancy phrase. It is an intricate manufacturing process that results in the very best clarity for calendared vinyl film. DAF is committed to upholding this high standard. DAF SDPC vinyl is transparent, with no waves, flow marks, or other visual blemishes. When installed correctly, DAF SDPC has the clarity of a glass window.

Uses: Tents, Curtains, Barriers, Screens, or anywhere clarity is of utmost importance.

Why DAF SDPC?

- High Clarity
- Remains clear, even outdoors in UV light (rated 1,000+ hours in accelerated weathering test with no yellowing or discoloration)
- Flame Resistant (California Fire Marshall Title 19 registration)
- Cold Crack Resistant (-20°F and beyond)
- Mildew Resistant
- Standard Caliper 16 GA (0.016”) and 20 GA (0.020”).
- Custom caliper and width available upon request

SDPC (rolls) vs. Glass or Acrylic (panels or sheets):

- Easier to Transport
- More Durable – Low risk of damage
- More Flexibility in Size – just unroll to the desired length. Not limited by “sheet size.”
- Can be folded
- Can be welded
