

DAF INSIDE MOUNT WINDOW PERF ONE WAY VISION PVC FILM

DAF INSIDE MOUNT WINDOW PERF. is a 5.7 mil PVC film with a 60%/40% perf pattern. (60 percent printable area, 40 percent open area pattern.) It has a unique low-tack grip adhesive that is repositionable and easy to remove with little to no residue after it is removed. Print to the window grip adhesive side, which has an ink-receptive coating, and apply the graphic to the inside of the window with the adhesive and image facing out. The polyester liner ensures a smooth application since it helps prevent tunneling and curling during installation. There are a lot of good reasons to apply graphics to the inside of a window facing out toward the street... Restrictive sign codes, as extra protection from vandalistic passersby and for the ease of a sheltered indoor installation. **DAF INSIDE MOUNT WINDOW PERF** makes these inside window applications even easier. Once the film is applied it will stick to the glass for up to a year. The 60/40 perforation pattern provides image quality and clarity when viewed from the outside and is see-through from the inside looking out.
