

## DAF Econo Rollup Film PVC + PET + PVC Composite Banner Film for Retractable Banner Stands and Other Displays.

### Key Features & Benefits

- Material PVC/PET/PVC Curl Resistant Composite Film.
- Front White, Quick Dry PVC with Low Glare Finish.
- Back Grey backside blocks ambient Light.
- Caliper 9 mils.
- Gloss (60°) 15
- Durability Promotional-Intermediate.
- Compatible: Eco-Solvent, Solvent, UV and Latex printers.

Properties: 250 gsm PVC+PET+PVC composite film with low glare print surface resulting in high color wide gamut images and graphics while holding fine details and type. Resistant to bulking or stretching under normal conditions.

Applications: General Graphics; Roll-up stands and Displays, Transit Shelters, Way-finds, Banners, Retail, POP, Events, Tradeshow etc.

### Handling and Finishing:

- Avoid touching material on print face which can cause fingerprints when imaged.
- Ink should be dry when it reaches the take up reel. If required, additional drying or out-gassing of inks can be achieved by laying printed graphics on table face up for a period of time.
- Product trims clean and even with straight edge and blade.
- Grommet acceptable.
- Lamination is not required for retractable rollup stands.
- Always store unused material in original packaging.
