

## Fedrigoni Ri-Jet C50 Ultimate Slide and Tack with Ri-Lam C30 Laminate

2024 Printing United Alliance "Pinnacle Award" for SAV <https://pinnacleawards.printing.org/gallery/non-output/page/2/>

**This 12-Year Cast film is the ideal solution for Customizing or Branding of any vehicle or fleet.**

**Unique Feature:** 12-Year Cast Film. This design builds in a small amount of surface tension allowing the installer to work less when applying resulting in faster installations. Why? Because our film and adhesive technology conforms almost by itself. Simply apply heat and allow it to cool (notice the film self-conforming). Then apply effortlessly for bubble free application to any 3D surface. Once the vehicle is fully wrapped heat the film with heat lamp or gun to 190 degrees Fahrenheit to fully set bond especially on recesses and curves.

**Ultimate Slide and Tack:** Our special adhesive formulation, surface tension design, combined with our proprietary microstructure liner, are revolutionizing installation techniques. The low initial adhesion of the adhesive means that the film can be easily repositioned on any surface over a longer period. Ultimately providing multiple adjustments while easily eliminating any trapped air, thus saving 25%-30% install time.

**Highly Conformable:** The high quality of the PVC guarantees optimal application on the most complex surfaces that require highly conformable and adaptable material for the best finish. This ensures high dimensional stability over the life of the application.

**For use with any printing technology:** The Ri-Jet C50 is particularly suitable for digital printing, compatible with Eco-Solvent, Latex, UV-Cure, UV-Gel and Resin platforms.
